

## Intellectual property protection

Short description of subject	Intellectual property rights (IPRs) are increasingly significant elements of economic policy: they are vital to developed countries in an age of global trade. Today's astounding new technologies, stemming from the digital and biotechnological revolutions are creating new problems. Lectures about Intellectual Property examines the major dilemmas that currently enmesh the subject: the omnipresent spread of IPRs across some recent technologies, the distraction caused by rights that achieve little of their intended purpose, and the seeming irrelevance of IPRs in the face of new technologies such as the internet.
Necessary requirements for practicals	Not applicable
Location	Lecture hall A – Collegium Veterinarium
Person responsible and Dept	Dr Sebastian Gnat <a href="mailto:sebastian.gnat@up.lublin.pl">sebastian.gnat@up.lublin.pl</a>  Collegium Veterinarium, II floor, room no 410 Department of Veterinary Microbiology, Faculty of Veterinary Medicine
