

M uu_uu	<b>MOR S2_7/2</b>
Field or fields of study	Plant Protection and Phytosanitary Control
<b>Name of the training module</b>	<b>Sanitary Entomology</b>
Language of instruction	english
Type of the training module (obligatory/optional)	optional
Level of the training module	Full-time studies II level
Year of study	I
Semester	1
Number of ECTS credits with a division into contact/noncontact	3 (1,6/1,4)
Title/degree, name and surname of the person in charge	Dr hab. Katarzyna Golan, associate prof.
Unit offering the subject	Plant Protection Department
Aim of the module	The aim of the course is to provide pest species related to the environment of human life, to know their biology, habitats and niches of their occurrence
Contents of the training module-a compact description of approx. 100 words	Characteristics of the main concepts and tasks of sanitary entomology. Sanitary entomology human history. Cockroaches - problems related to their occurrence, nuisance and control. Body louse, fleas - the risk of direct and transmitted diseases. Epidemiological role of flies, including mosquitoes. Buds, horseflies, midges. Ants - different species coming from outside. Hornets, wasps and other aculeata - a threat to human health. Other allergenic and parasitic arthropods (Bedbugs, Psocoptera, Argas sp. pigeons, ticks).
