

Code of subject	M_WE_SEM10 CHPK ST1
Field of study	Veterinary
Name of the training module including the Polish name	Diseases of dogs and cats – clinical training. Block 1 Choroby psów i kotów - staż. Blok 1
Language of instruction	English
Type of the training module	obligatory
Level of the training module	Master level
Form of studies	stationary
Location in the programme (year)	V
Location in the programme (semester)	X
Number of ECTS credits with a division into contact/noncontact	1
Name and surname of the person in charge	prof. Stanisław Winiarczyk
Unit offering the subject	Department and Clinic of Animal Surgery Department and Clinic of Animal Internal Diseases, Department and Clinic of Animal Reproduction Department of Epizootiology and Clinic of Infectious Diseases
Aim of the module	Mastering practical skills in blood diseases of dogs and cats. Familiarisation with the basic principles of diagnostics and therapeutics, including surgical, treatment of surgical diseases of dogs and cats, as well as prophylactic management, including infectious diseases.
Learning outcomes – the total number of learning outcomes may not exceed (4-8) for the module. The description of the intended learning outcomes that a student should achieve after the completion of the module should be provided. The outcomes for all forms of classes used should be presented.	Knowledge:
	The student knows and understands:
	K1. Has extended knowledge of diseases occurring in dogs and cats and of the pathology mechanisms of individual systems.
	K2. Has working knowledge of the diagnostic management and therapy of individual diseases in dogs and cats.
	Skills:
	The student can:
	S1. Take medical story, conduct clinical examination according to the clinical examination plan, analyse in detail and correctly interpret clinical symptoms, the results of laboratory and additional examinations, formulate diagnoses, taking differential diagnosis into account, and undertake therapeutic and prophylactic actions.
S2. Prescribe human medicines and psychotropic substances necessary for proper therapy of a patient – according to the drug cascade and binding regulations.	
S3. Perform basic veterinary medical procedures on dogs and cats.	
S4. Apply sedation, anaesthesia, aseptic and antiseptic principles and perform basic surgical and gynaecological-obstetric procedures in dogs and cats.	
S5. Follow procedures when identifying suspected rabies in a dog or cat.	

	<p>Social competence:</p> <p>The student is prepared to:</p> <p>C1. Observe the principles of professional ethics</p> <p>C2. Understand their own limitations, the necessity of constant education and self-improvement in the field of canine and feline diseases.</p>
<p>Preliminary and additional requirements</p>	<p>according to the Sequence of subjects</p>
<p>Contents of the training module – a compact description of approx. 100 words.</p>	<ol style="list-style-type: none"> 1. Evaluation of the medical story and performing clinical examination. 2. Animal restraint 3. Understanding of the procedures of personal safety and OH&S of the workplace 4. Clinical documentation 5. Collection, transport and storage of the material for basic diagnostic procedures (blood, urine, etc.) 6. Selection of analytical method for the analysed parameter 7. Preparation of cover letter / prescription for auxiliary tests 8. Operation of basic diagnostic equipment 9. Preparation and microscopic evaluation of biological material 10. Issuing of the prescription 11. Issuing of the prescription for narcotica 12. Detailed examination of the organ / system 13. Rectal examination 14. Medical imaging interpretation (USG, x-ray, etc.) 15. Follow-up examination 16. Injection 17. Vascular access 18. Preparation and administration of fluids 19. Animal care procedures 20. Choice of the treatment adequate for the diagnosed disease including medication 21. Understanding of the use of biopreparations and chemotherapeutics 22. Preparation of surgeon's table 23. Assistance during surgery / gynaecological-obstetrical procedure 24. Tissue suturing 25. Intubation 26. Claw correction 27. Wound dressing 28. Application / change of the medical dressing 29. Bladder emptying procedure 30. Probing 31. Assistance during anesthesia

	<p>32. Vaginal examination</p> <p>33. Transcervical catheterisation / insemination</p> <p>34. Preparation of the vaccination scheme</p> <p>35. Knowledge of the rules of the official epizootic investigation</p>
Recommended and obligatory reading list	<ol style="list-style-type: none"> 1. Small Animal Surgery – T. Fossum 2. Textbook of Small Animal Surgery, vol. 2 - D. Slatter 3. The intended forms/activities/ teaching methods	Clinical training carried out in the Veterinary Clinic of Faculty of Veterinary Medicine in Lublin, discussion of clinical cases, discussion.
Methods of verification and documentation forms of the achieved learning outcomes	<p>Detailed criteria for the assessment of exams and test assignments</p> <p>K – discussion, analysis of clinical cases.</p>

S – passing practical skills – basic procedures for animals, dressings, injections, infusions, assisting in surgical procedures, preparing a medical story

C – participation in discussion, behaviour in front of the patient, conversation with the animal caretaker, behaviour in the office
Students may acquire individual skills during training – knowledge of individual procedures is evidenced by entry in the Day One register and written assignments are retained for a period in accordance with regulations.

Dog and Cat Surgery:

Students' knowledge is verified by analysing and discussing clinical cases. Assessment is made of the performance under the supervision of the attending doctor of veterinary medicine during the admission of patients and surgical procedures. Situations and approach to patients, ability to communicate in a team and ability to start a conversation with an animal owner are analysed and discussed. All components are elements of the practical assessment. The grading scale is in accordance with the Book of Education Quality, i.e. 2-5 in%.

Internal diseases of dogs and cats:

Verification of knowledge, skills and social competences is carried out jointly through observation of the student's practical and professional activities: performed clinical examination with a history, manner of communication with owners, accuracy of diagnostic and therapeutic decisions made and level of social competences presented. Documentation of learning outcomes is done by making entries in the student's internship scorecard. The final grade is determined by the level of the presented knowledge, the practical efficiency of the performed examinations and procedures, and the attitude concerning the presented social competences. The assessment is made by the academic teacher based on the principles of good clinical practice and the code of veterinary ethics and deontology.

The grading scale is in accordance with the Book of Education Quality, i.e. 2-5 in%.

Reproduction in dogs and cats:

K – Knowledge outcomes – discussion, analysis of clinical cases – as part of the practical credit – graded. The student is asked 2-3 questions. To get a positive mark, the student must answer at least 60% of each question.

S – Outcomes in the scope of skills – assessment of the correctness of veterinary activities performed under the supervision of the instructor during the service of the patient. Graded practical assessment – the student is given 1-2 practical tasks to perform. To receive a positive grade, the student must complete each task at least 60% correctly. The final grade is the average of the grades for each theoretical question and each practical task, according to the criteria specified in the FCQE.

	<p>C – Outcomes in the scope of competences – discussion, analysis of clinical situations.</p> <p>Infectious diseases of dogs and cats: To be allowed to pass the training, the student must present an approved medical story, prepared on the basis of a sheet developed by the Clinic.</p> <p>Credit for the training is given in the form of an oral response with an animal. The student answers 5 questions and can receive 2 points for each question. The maximum number of points is 10. At least 60%, i.e. 6 points, must be obtained to receive a pass. Questions and scores are recorded. The grading scale is in accordance with the recommendations of the Book of Education Quality. Written assignments are archived for a period of time in accordance with regulations.</p>		
Balance of ECTS credits	CONTACT		
		<i>Hours</i>	<i>ECTS</i>
	classes – clinical training	29	0,97
	credit for training	1	0,03

Relationship between subject learning outcomes and veterinary studies learning outcomes	<p>K1. – WE_W17 ++ K2. – WE_W18 ++, WE_W21 ++ S1. – WE_U14 ++, WE_U16 ++, WE_U19 ++ S2. – WE_U23 ++ S3. – WE_U17 ++, WE_U24 ++ S4. – WE_U16 ++, WE_U19 ++, WE_U25 ++ S5. – WE_U21 +++ Sc1. – WE_K2 ++ Sc2. – WE_K5 ++, WE_K6 ++</p>		
Impact of selected compounds to final grade	<p>Dog and Cat Surgery: The preliminary requirement for passing the course is the participation in the required number of class hours and receiving a positive grade – 100% of the final grade.</p> <p>Internal diseases of dogs and cats: The final grade is determined by the level of the presented knowledge, the practical efficiency of the performed examinations and procedures, and the attitude concerning the presented social competences. The assessment is made by the</p>		

academic teacher based on the principles of good clinical practice and the code of veterinary ethics and deontology.

The preliminary requirement for passing the course is the participation in the required number of class hours and receiving the practical credit – 100% of the final grade.

Reproduction in dogs and cats:

The preliminary requirement for passing the course is the participation in the required number of class hours and receiving the practical credit – 100% of the final grade.

Infectious diseases of dogs and cats:

The final grade for the training consists of 100% of the oral grade.

The final grade is the average of the grades given by the 4 Departments.
