Module code	M_WE_SEM9 WET COURT		
Field of study	Veterinary medicine		
Module name, also the name in English	Forensic veterinary Medicine		
	Weterynaria sądowa		
Language of instruction	English		
Module type	Obligatory		
Level of studies	Long-cycle master's degree studies		
Form of study	Full-time		
Year of study in the field of study	V		
Semester of study in the field of study	IX		
ECTS credits, divided into contact/non-	1 (0,9/0,1)		
contact hours			
Academic title/degree, name of the	Piotr Listos, dr hab vet, dr of law		
person responsible for the module			
Unit teaching the module	Department of Pathomorphology and Forensic Veterinary Medicine		
Module objective	The aim of teaching the module is to master basic legal terms and		
	skills of making expertises and drawing up written or oral forensic		
	opinions on their basis, in particular for the needs of judicial		
	authority, state administration bodies and private individuals.		
The learning outcomes for the module	Knowledge:		
include a description of the knowledge,	K 1. The student has a basic - general legal knowledge		
skills and social competences that the	K 2. The student knows the principles of expertise and forensic		
student will gain after completing the	veterinary opinion making; preparation of written veterinary		
module.	medical opinions based on examination plans of various animals		
	K 3. The student knows the principles of forensic veterinary		
	opinion making based on evidence in the case file		
	Skills:		
	S 1. The student has the ability to perform before procedural		
	bodies as an expert witness		
	S 2. The student is able to carry out a forensic veterinary		
	examination and autopsy of any animal species.		
	S 3. The student is able to make a forensic veterinary opinion on		
	the basis of a given evidence in the form of case files, describing		
	it properly, using appropriate medical and veterinary terms (
	both Polish and Latin) and in the correct way to combine all data		
	collected from the interview into logical sequence with changes found during the examination		
	Social competences:		
	C 1. The student has a developed respect for the law		
	C 2. The student has the ability to conduct a forensic veterinary		
	expertise properly and to draw up a medical veterinary opinion on its basis.		
	C 3. The student has a sense of the importance of the exercised		
	profession and is aware of the conscientiousness of practicing it.		
Prerequisites and additional	Credit for Pathomorphology Module		
requirements	create for radiomorphology intoduce		
reganements			

Lectures: - the role of forensic veterinary medicine in the pursuit to discover substantive truth and in the service of protecting the rule of law, - the role of the veterinarian as a person with specialized knowledge, - expert witness, - general overview of legal terminology, - veterinarian liability for malpractice, - determining the cause of animals death Practical classes: - forensic medical and veterinary expertise, - preparing written and giving oral veterinary medical opinions based on examination plans for various animal species, - animal autopsy for forensic purposes with particular emphasis on the action mechanism of various types of trauma on the animal system and discussion of the dynamics of changes in the parameters of signs of death. List of core and supplementary L
