Question 1 Describe the genomic mechanism	of hormone action and list ho	rmones which work in this way.

Theoretical study of Seminary – hormones

JTW 11.10.2016 1 from 7

Question 2 Describe the non-genomic mechanism of hormone action and list hormones which work in this way.			

JTW 11.10.2016 2 from 7

Question 3 List hormones which regulate the sugars metabolism. Provide with location of their synthesis and release, describe their biological meaning.			

JTW 11.10.2016 3 from 7

Question 4 List hormones which regulate blood calcium concentration. Provide with location of their synthesis and release, describe their biological meaning.			

JTW 11.10.2016 4 from 7

Question 5 List hormones which regulate the energy metabolism. Provide with location of their synthesis and release, describe their biological meaning.			

JTW 11.10.2016 5 from 7

Question 6 Describe the hormonal profile of parturition.			

JTW 11.10.2016 6 from 7

Question 7 Describe the hormonal profile of long-lasting stress.			

JTW 11.10.2016 7 from 7
