

Environmental enrichment in ZOO

What is Environmental Enrichment?

- Techniques in captive animal husbandry which attempt to meet the physical and psychological needs of an animal in an enclosure with respect to the veterinary/medical, biology and behavioral/ecological factors in line with the species natural history.

Multi-species
exhibition

**The ability to choose
the environment**

Microenvironment

Natural enrichments

- i.e. for giant panda

... and for red panda

... and for felids

Are people allowed
to enter cages with
animals in the zoo?

... and is it possible to pet
(stroking) animals in the zoo? ?

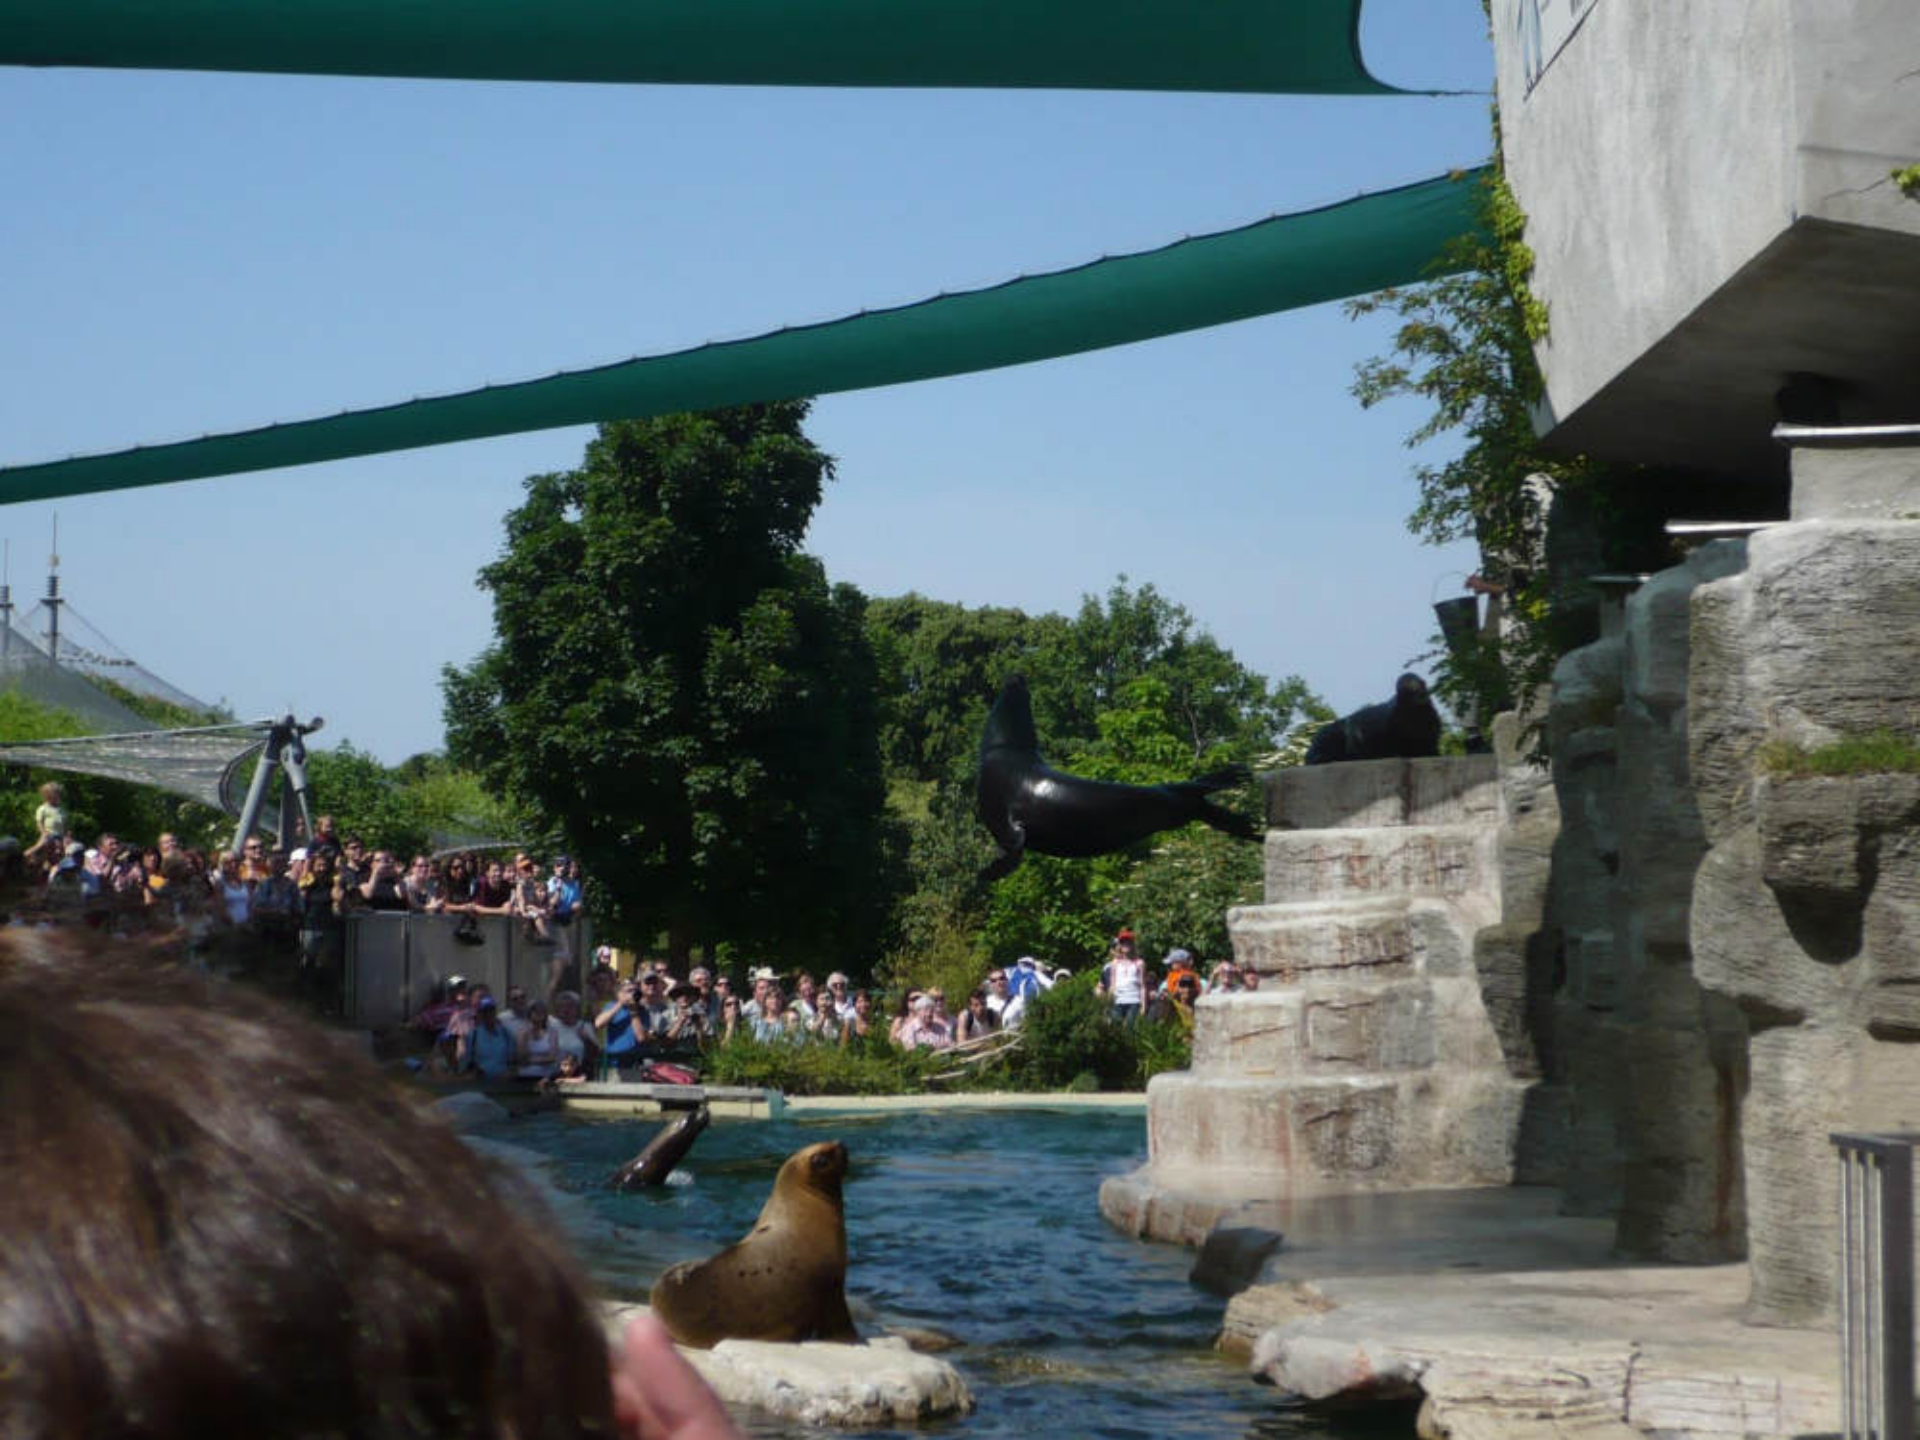

diet

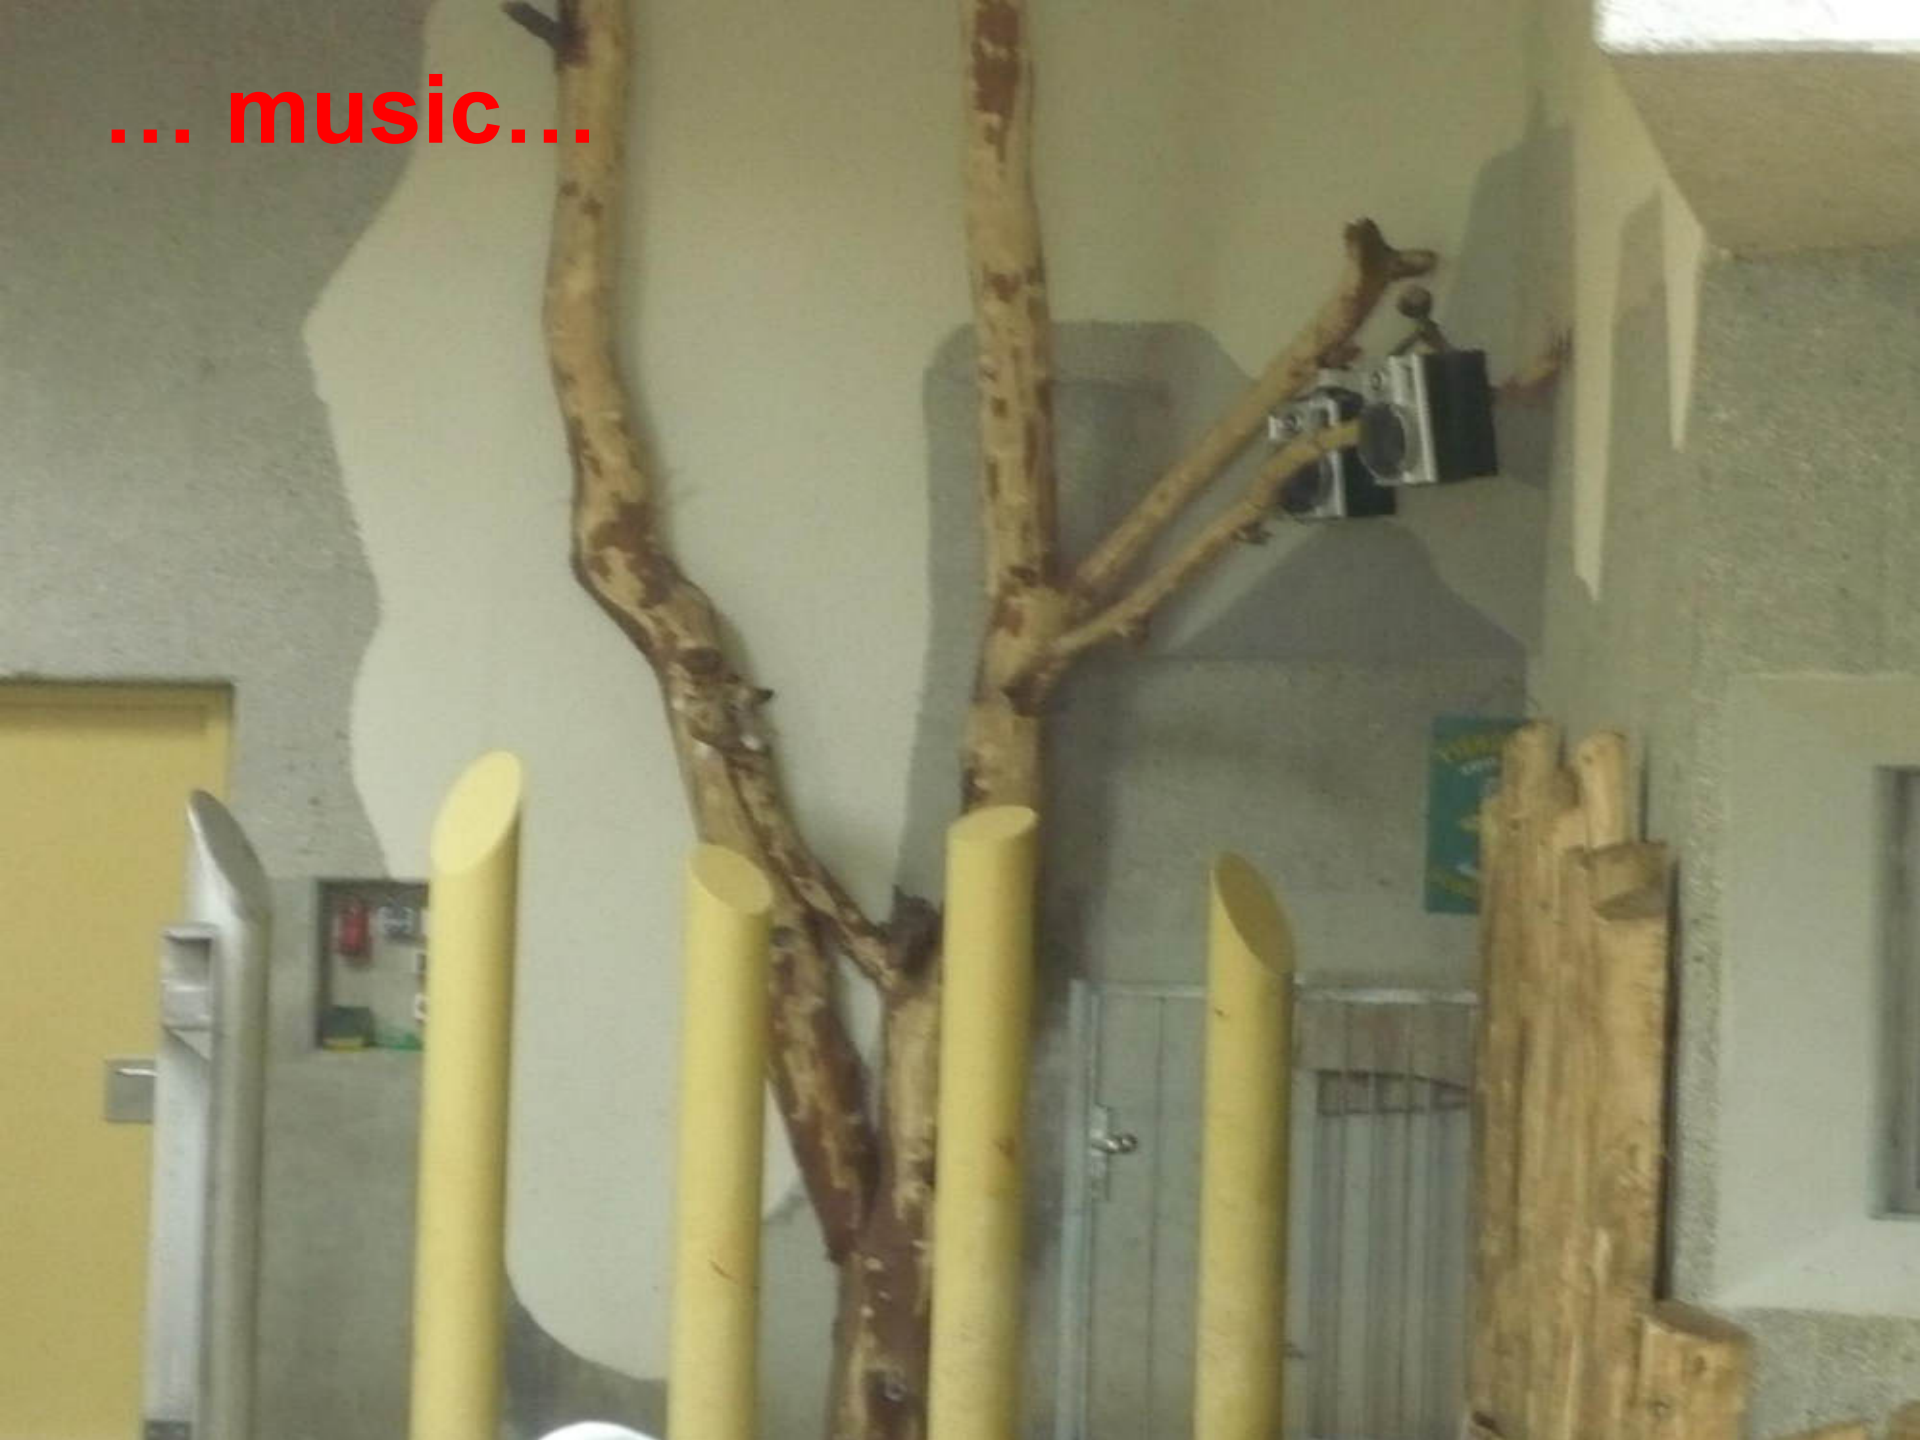

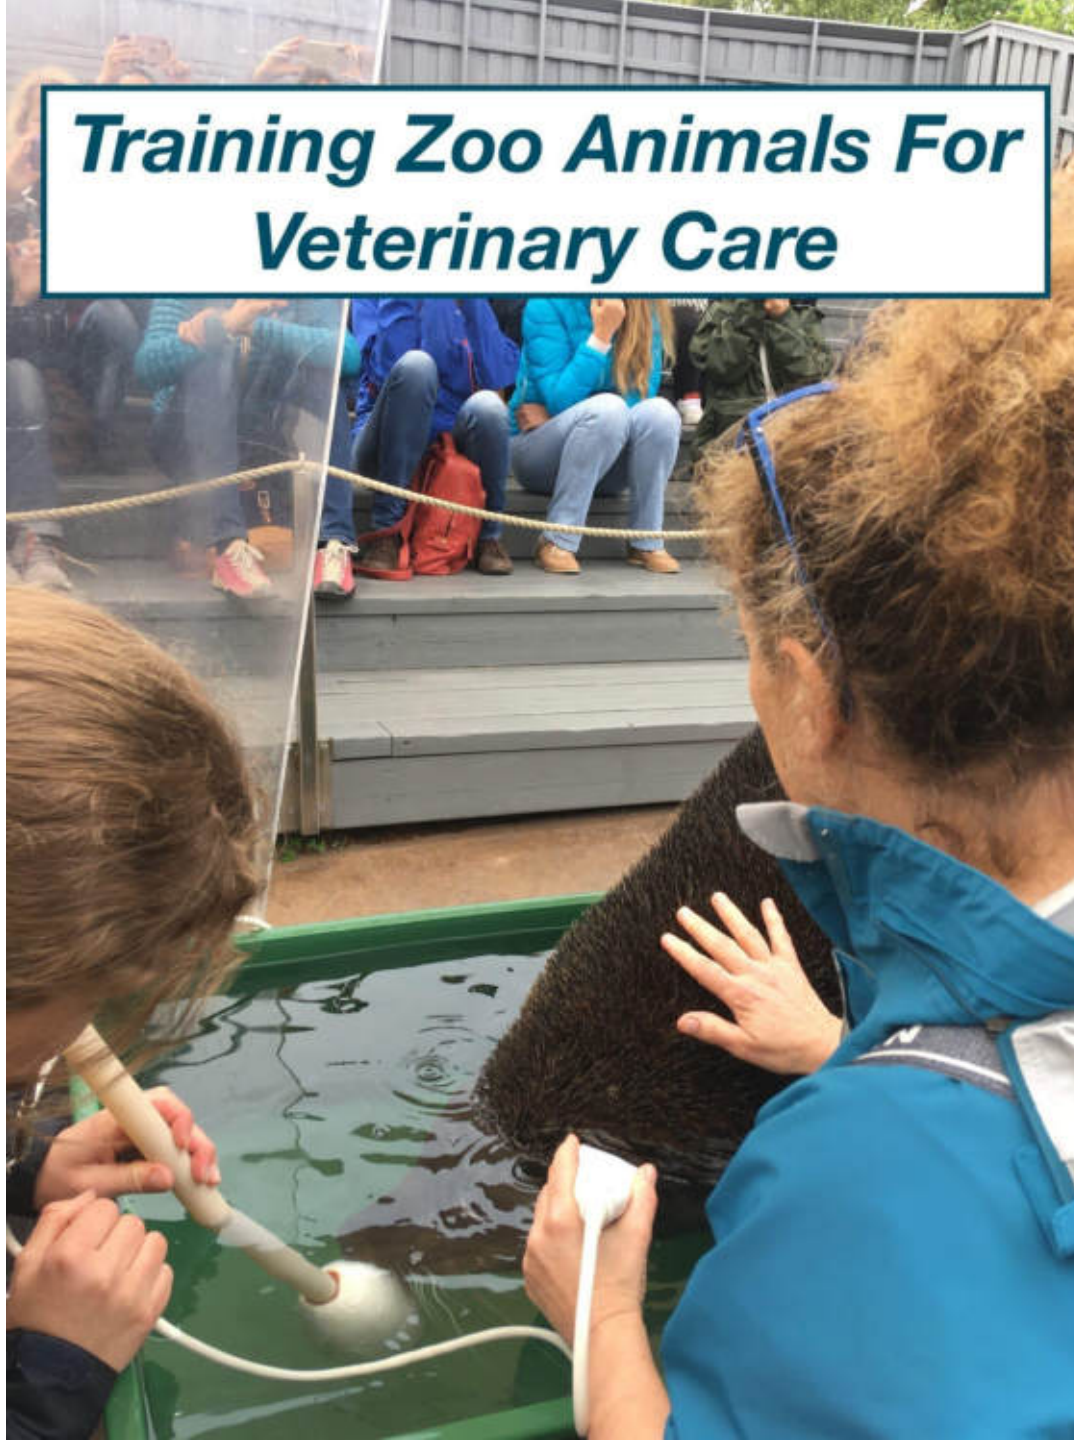

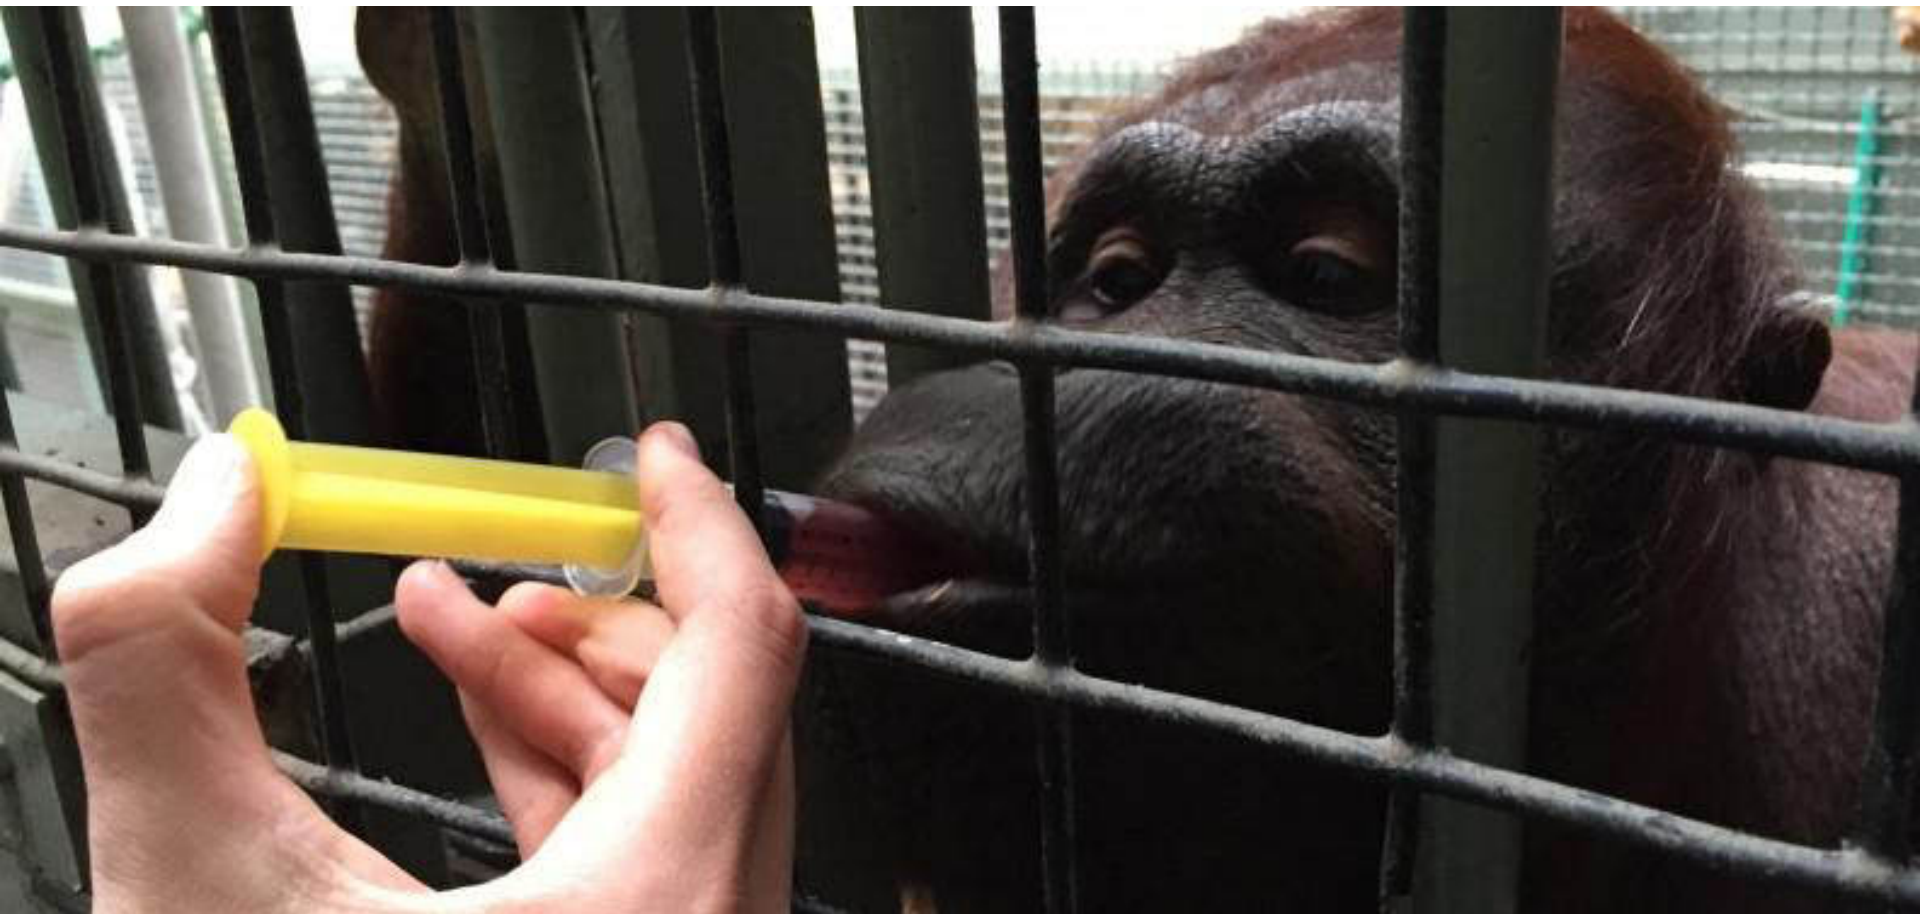

... music...

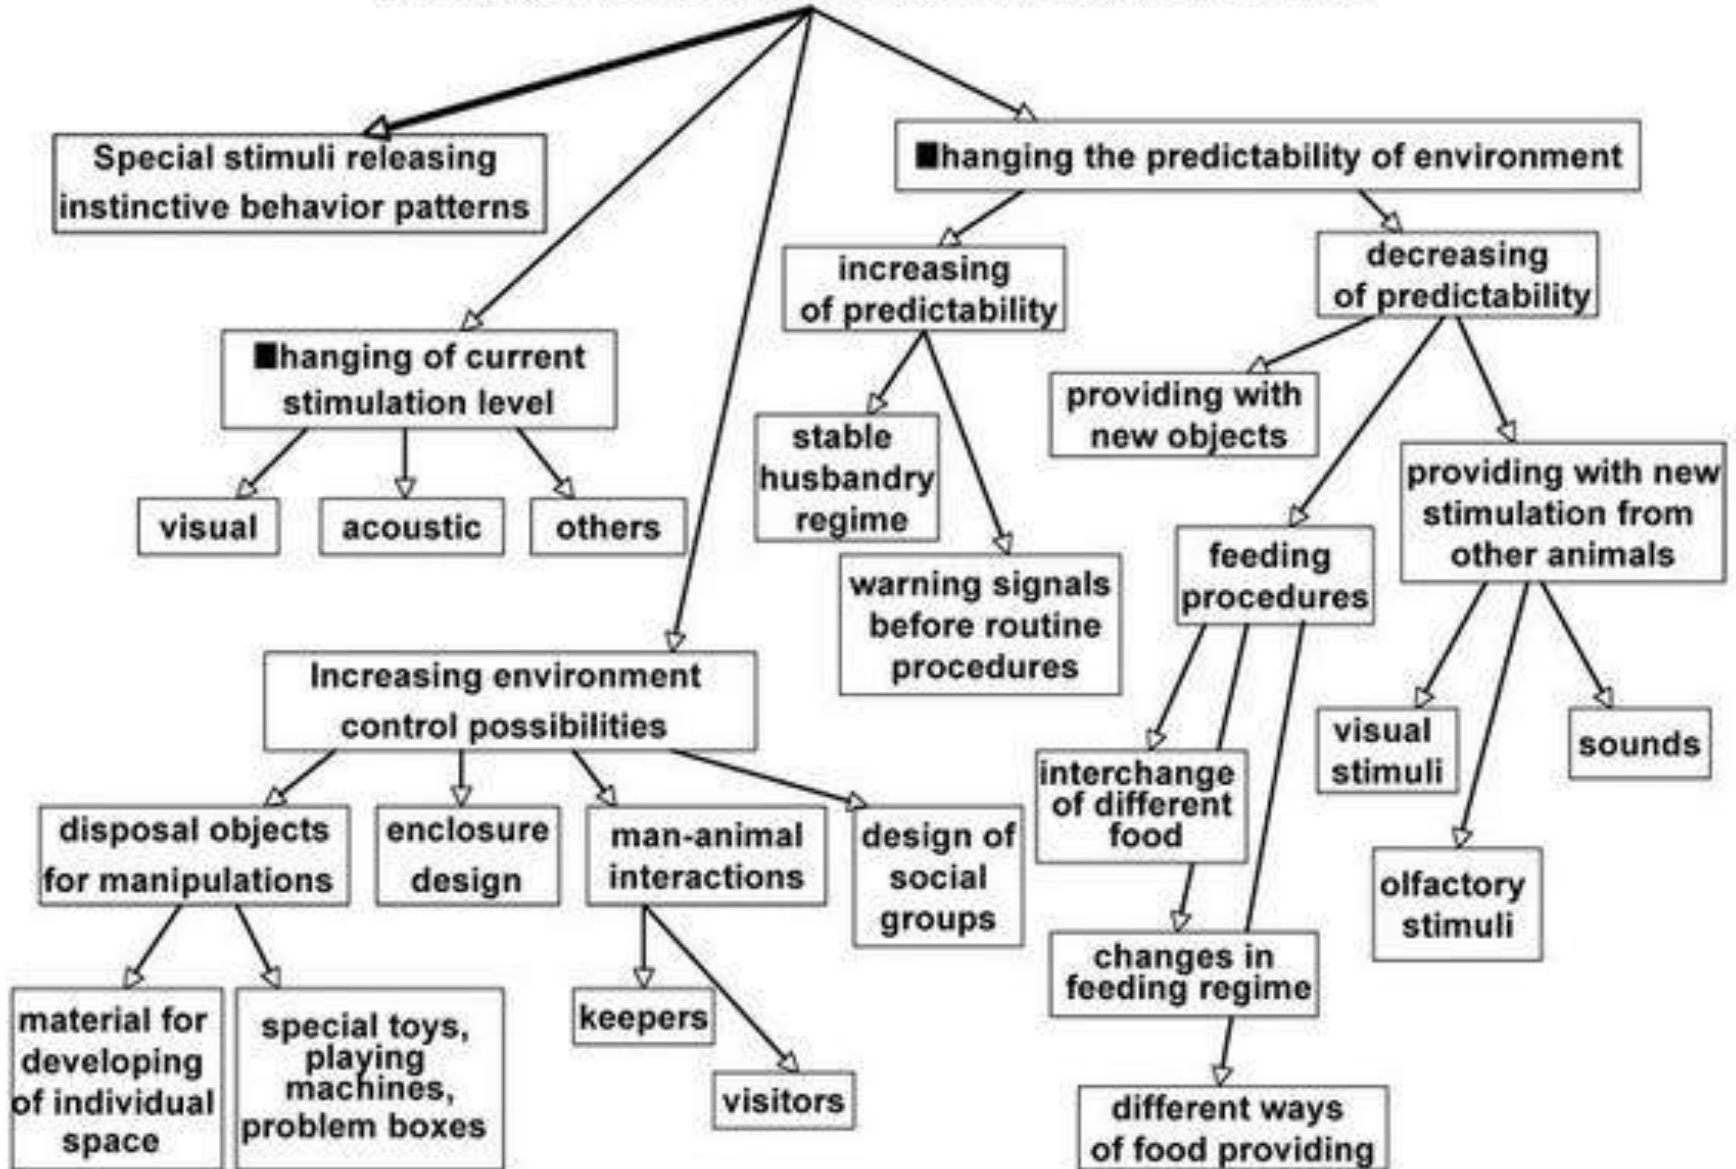

Training Zoo Animals For Veterinary Care
