submissions:

**30 September 2022**

### Message from the Guest Editors

Green leafy vegetables are an important group of horticultural plants and an essential component of the human diet. Many plant species are still relatively unknown as leafy vegetables. It would be valuable to learn more about their physiology and yield, as well as their nutritional value under improved production conditions.

The application of various substances to the leaves of cultivated plants, including not only fertilizers and plant protection products, but also growth regulators and biostimulants, is becoming increasingly popular worldwide. It is important to know to what extent the application of these treatments affects not only the yield, but also the nutritional value of leafy vegetables. We hope to find answers to these and other questions that concern new cultivation technologies for various plant species belonging to the leafy vegetables.

Research articles, reviews, short notes, and opinion articles indicating new technologies in the cultivation of green leafy vegetables, as well as physiological, biochemical, and molecular studies focused on these issues, are welcome to our current Special Issue on "New Advances in Green Leafy Vegetables".

## Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), AGRICOLA, AGRIS, FSTA, and many other databases.

**Journal Rank:** JCR - Q1 (*Horticulture*) / CiteScore - Q1 (*Horticulture*)
