

<b>SD UP LUBLIN 2021/2022</b>	<b>SD_013</b>
<i>Course Title</i>	<b>PhD Seminar III</b>
<i>Language of lecture</i>	English
<i>Type of course</i>	Obligatory
<i>Year of study</i>	II
<i>Semester of study</i>	3
<i>Name of lecturer - academic degree</i>	Prof. dr hab. Urszula Gawlik-Dziki
<i>Department/ discipline</i>	Department of Biochemistry and Food Chemistry
<i>Aim of the course</i>	The aim of the course is to familiarize doctoral students with the main research trends undertaken in the country and abroad in the discipline of food and nutrition technology. Doctoral students will gain knowledge of national and European research centers in the discipline, they will learn about innovative technological solutions used in food technology, as well as the trends in the development of this discipline. Doctoral students will be acquainted with the possibilities of obtaining foreign internships, with particular emphasis on the ERAZMUS program, and the sources of funding for research projects. Task for PhD students: presentation of the progress of work on research projects and their critical evaluation.
<i>Course contents</i>	The first part of the seminar covers issues related to the principles of modern classification of scientific fields and disciplines, the subject of research in the field of environmental engineering in Poland and abroad, presentation of the most important scientific issues undertaken in the discipline, innovative technological solutions, opportunities for cooperation with other fields and disciplines of science and future directions of development. The second part of the training module is focused on practical issues related to the preparation of applications for funding research projects and research internships and their verification.
