

INVITATION – LOGI 2024

BIP “Green Transport and Novel Trends in Transport”

Dear friends,

From 14 October to 18 October 2024, the Department of Transport and Logistics at the Institute of Technology and Business in České Budějovice, Czech Republic under the auspices of the Czech Logistics Association (CLA), the Association of Forwarding and Logistics of the Czech Republic (SSL) and the Association of Transport of the Czech Republic (SvD), will organize the Erasmus BIP.

The crucial objective of brainstorming and virtual discussion will be to acquire opinions of students and academicians on the topic of environmentally friendly (so called green) transport and new development trends in transport.

Next goal of the Erasmus BIP will be to present the concept of transport as a multi-disciplinary subject and study, including technical, technological and economic disciplines. Transport will be understood as a field that contributes to the economic, social and cultural development of the territory and that combines technical and technological disciplines in mutual interconnected bindings.

Bachelor, Master as well as Doctoral (PhD) students from various transport-related study programmes are highly welcome to participate in the BIP.

The organizing committee, namely Rudolf Kampf and Ondrej Stopka, cordially invites you.

Venue: České Budějovice, Czech Republic
