**Your road to ULSL
study Global Management
in Smart Agriculture!**

What do you need to know about Global Management in Smart Agriculture Programme?

Faculty: Agrobioengineering

Type of studies: first-cycle (full time) studies
/ Bachelor's (Engineer's) degree

Duration: 7 semesters

Admission fee: 150 EUR

Diploma: recognized within European Union

Why is it worth studying Global Management in Smart Agriculture at ULSL?

- Learn about modern food production technologies, the range of machinery used in smart agriculture, the basics of GIS and remote sensing, computer programs used in precision agriculture dedicated to stationary and mobile devices, and the development of automatic and electronic control systems.
- Acquire knowledge and skills in the implementation of modern solutions in agribusiness management, based on analyzing and forecasting economic phenomena and processes.
- Work in production and service enterprises, research institutes and scientific institutions, agricultural consulting companies, administration and business units where agricultural, technical, economic and information technology knowledge is required, as well as an owner of enterprises, farms, or a manager managing agricultural production.
