

<b>SD UP LUBLIN 2021/2022</b>	<b>SD023</b>
<i>Nazwa modułu Course Title</i>	<b>Seminarium, dyscyplina: weterynaria</b> <i>Seminar, discipline: veterinary medicine</i>
<i>Język wykładowy Language of lecture</i>	English
<i>Rodzaj modułu kształcenia Type of course</i>	Obligatory
<i>Rok kształcenia w Szkole Doktorskiej Year of study</i>	<b>III</b>
<i>Semestr kształcenia w Szkole Doktorskiej Semester of study</i>	<b>VI</b>
<i>Nazwisko i imię osoby odpowiedzialnej - stopień naukowy Name of lecturer – academic degree</i>	Prof. dr hab. Ewa Tomaszewska
<i>Osoby współprowadzące Co-lecturer</i>	-
<i>Jednostka oferująca przedmiot/dyscyplina Department/ scientific discipline</i>	<b>Department of Animal Physiology/discipline: veterinary</b>
<i>Cel modułu Aim of the course</i>	The aim of the module is to familiarize doctoral students with the main research trends in the veterinary discipline, especially in an international context. Doctoral students will gain knowledge of national and European research centers in the discipline, they will learn about innovative technological solutions that are implemented in veterinary practice, as well as the current trends in the development of this discipline. Moreover, doctoral students will be acquainted with the principles of writing scientific papers, including original articles, reviews and monographs. They will also learn the criteria for reviewing scientific papers and the requirements for reviewers.
<i>Efekty kształcenia Odniesienie do efektu kształcenia może wystąpić tylko jeden raz. Max 254 znaki (ze spacjami) na efekt. Learning outcomes</i>	<b>Wiedza:</b> <i>Knowledge:</i>
	W1. PhD student knows the main research and development trends in the veterinary discipline.
	W2. A doctoral student can name the most important academic centers with Faculties of Veterinary Medicine.
	W3. The doctoral student has advanced knowledge of the structure of a scientific article and the methods of writing various types of scientific papers.
	W4. The doctoral student knows the criteria for the review of scientific papers.
	<b>Umiejętności:</b> <i>Practical skills:</i>
	U1.The doctoral student can identify future research trends in the discipline.
	U2.The doctoral student is able to communicate fluently in the field of his specialization with other researchers, incl. make a critical analysis and evaluation of research results, present your results and views to the international scientific community.
	U3. A PhD student correctly constructs a scientific article.
	U4.The doctoral student reviews scientific papers in accordance with the principles adopted in science.
<i>Kompetencje społeczne: Social skills:</i>	<b>Kompetencje społeczne:</b> <i>Social skills:</i>
	K1. The doctoral student is aware of the need to constantly expand his knowledge.
	K2. PhD student is able to objectively evaluate scientific works.
	K3. A doctoral student is able to disseminate research results, also in popular science forms.
<i>Wymagania wstępne i dodatkowe Prerequisites and additional requirements</i>	Seminar V

Treści modułu kształcenia – zwarty opis ok. 100 słów. <i>Course contents</i>	The training module covers issues related to the principles of modern classification of scientific fields and disciplines, the subject of research conducted in Poland and abroad, the presentation of veterinary departments and the most important leading topics of their activities as opportunities for establishing international cooperation, innovative technological solutions implemented in practice, opportunities for cooperation with other fields and disciplines of science and future directions of development. The second part of the education module focuses on the principles and criteria of writing and reviewing scientific papers, requirements for reviewers and the method of reliable evaluation of scientific articles.
