

EEC Conference 2025

**1st International Conference
Emerging Environmental
Contaminants - Current
Status, Challenges and
Perspectives**
April 9-10, 2025 Rzeszów, Poland

Conference Invitation

The conference is dedicated to discussing together one of the greatest challenges of modern times - emerging environmental pollution. During the event, we will focus on sources and effects of pollutants such as pesticides, PFAS, microplastics, pharmaceuticals, and nanoparticles, as well as on their impact on human health and ecosystems. The aim of the conference is to present the current state of knowledge and share experiences in the field of environmental pollution. In addition, the organizers' intent is to activate and integrate the academic community, create a place conducive to the exchange of ideas and information. The conference will also provide an ideal environment for developing new cooperation and meetings with experts.

The topics to be discussed during the conference include, but are not limited to:

- Methods of Environmental Monitoring and Management - Current Status,
- Water and Soil Pollution Control,
- Environmental Protection, Treatments, Remediations, and Prevention,
- Biotechnology in Environmental Protection,
- Law, Regulations, Legislations,
- Pollutions ver. Well-being, Quality of Living.
